UNITED STATES DISTRICT COURT
CENTRAL DISTRICT OF CALIFORNIA

JUSTIN BUNNELL, FORREST
PARKER, WES PARKER, and
VALENCE MEDIA, LTD.,

Plaintiffs,

vs.

MOTION PICTURE ASSOCIATION
OF AMERICA,

Defendant.

Case No. 2:06-cv-03206-FMC-JCx

**ORDER GRANTING
DEFENDANT'S MOTION FOR
SUMMARY JUDGMENT**

**ORDER DENYING PLAINTIFFS'
MOTION FOR SUMMARY
JUDGMENT**

#185

This matter is before the Court on Defendant's Motion for Summary Judgment (docket no. 136), filed July 2, 2007, and Plaintiffs' Motion for Summary Judgment (docket no. 169), filed July 24, 2007. The Court has read and considered the moving, opposition, and reply documents submitted in connection with these motions. The matter was heard on August 20, 2007, at which time the parties were in receipt of the Court's Tentative Order. For the reasons and in the manner set forth below, the Court hereby **GRANTS** Defendant's Motion for Summary Judgment and **DENIES** Plaintiffs' Motion for Summary Judgment.

I. BACKGROUND

This case involves Defendant Motion Picture Association of America’s (Defendant or MPAA) acquisition of emails that were sent from or received by Plaintiffs Justin Bunnell, Forrest Parker, Wes Parker and Valence Media, LLC (Plaintiffs or Bunnell parties).

A. Factual Background

Plaintiffs own and operate a website as part of an online computer network known as “BitTorrent,” which is a peer-to-peer network that facilitates the copying and distribution of large files. Defendant is a motion picture trade association that, among other things, conducts copyright infringement investigations and assists with criminal and civil litigation involving copyright infringement.¹ Plaintiffs allege Defendant procured and conspired to procure “hacked” private information that Defendant then used to interfere with Plaintiffs’ business operations.

The alleged “hacker” is Mr. Rob Anderson (Anderson), a former business associate of Plaintiff Justin Bunnell (Bunnell). In 2001, Bunnell employed Anderson as an independent contractor for BA Ventures, a company Bunnell owned at the time. BA Ventures was in the business of online advertising and Anderson earned commissions by selling said advertising. In the spring of 2005, Anderson and Bunnell’s relationship soured and Anderson left BA Ventures.

However, before Anderson left, he “hacked” into Plaintiffs’ email system. First, Anderson calculated Plaintiff’s IP address to connect to Plaintiff’s actual server. Then, he used the standard administration name as the account name or “log in” name, and guessed the correct password. Once he obtained access to the

¹ In a related case in front of this Court, *Columbia Pictures, et. al. v. Justin Bunnell et. al.*, CV 06-1093 FMC (C.D.Cal.), plaintiffs are motion picture studios that have sued the Bunnell parties for operating a website that allegedly enables and encourages Internet users to locate and download unauthorized copies of copyrighted motion pictures and television shows for free.

1 administrative functions of Plaintiffs' email server software, he enabled the
2 software's "copy and forward" function. Anderson configured the server
3 software so that every incoming and outgoing email message would also be
4 copied and forwarded to his anonymous Google email account. Anderson's
5 original intent in hacking into Plaintiffs' email system was to keep track of what
6 the Bunnell parties were saying about him after he left BA Ventures.

7 On June 7, 2005, Anderson emailed the MPAA to offer antipiracy
8 consulting services. Anderson stated that his company, Vaga Ventures, had
9 obtained possession of documents regarding *Torrentspy.com* and other pirate
10 BitTorrent sites. Anderson was referred to MPAA senior legal counsel, Dean
11 Garfield. The two first spoke on June 14, 2005. Anderson told Garfield he had
12 an informant who could get him anything he wanted. Anderson offered to sell
13 the information to the MPAA. Two weeks later, after negotiations regarding a
14 formal written agreement, Anderson emailed 34 pages of documents to the
15 MPAA in return for \$15,000. The final agreement, signed by Anderson on June
16 30, 2005, represented that Vaga Ventures was in lawful possession of the
17 information, the information was obtained through legal means, and that the
18 disclosure did not violate any contract or agreement between Vaga Ventures and
19 any third party.

20 ***B. The Instant Motions***

21 The above facts are not in serious dispute. Rather, with their cross motions
22 for summary judgment, the parties ask the Court to determine whether
23 Anderson's actions violated the federal Wiretap Act, 18 U.S.C. §§ 2510 et seq.,
24 and the California Invasion of Privacy Act, Cal. Penal Code §§ 631 et seq..

25 Plaintiffs claim that Anderson's actions in configuring the email software
26 to copy and forward Plaintiffs' incoming and outgoing emails constituted an
27 interception of electronic communications under the Wiretap Act. Plaintiffs also
28 move the Court to conclude as a matter of law that the MPAA knew or had

1 reason to know of Anderson's alleged violations of the Wiretap Act.

2 On the other hand, Defendant claims that Anderson's activities were not an
3 "interception" because the emails were in storage at the time, and the Ninth
4 Circuit has held that a communication acquired while in "electronic storage" is
5 not "intercepted" under the Wiretap Act.

6 Additionally, Defendant also moves for summary judgment as to whether
7 Plaintiffs have identified valuable trade secrets. Defendant claims that Plaintiffs'
8 trade secrets claim must fail because they have not met their burden in describing
9 the subject matter of the trade secret with sufficient particularity to separate it
10 from matters of general knowledge.

11 II. APPLICABLE LAW

12 A. *Summary Judgment Standard*

13 Summary judgment is proper only where "the pleadings, depositions,
14 answers to interrogatories, and admissions on file, together with the affidavits, if
15 any, show that there is no genuine issue as to any material fact and that the
16 moving party is entitled to judgment as a matter of law." Fed. Rule Civ. Pro.
17 56(c); *see also Matsushita Elec. Indus. Co. v. Zenith Radio Corp.*, 475 U.S. 574,
18 106 S.Ct. 1348, 89 L.Ed.2d 538 (1986).

19 The moving party bears the initial burden of demonstrating the absence of
20 a genuine issue of material fact. *Anderson v. Liberty Lobby, Inc.*, 477 U.S. 242,
21 256, 106 S.Ct. 2505, 91 L.Ed.2d 202 (1986). Whether a fact is material is
22 determined by looking to the governing substantive law; if the fact may affect the
23 outcome, it is material. *Id.* at 248, 106 S.Ct. 2505.

24 If the moving party meets its initial burden, the "adverse party may not
25 rest upon the mere allegations or denials of the adverse party's pleading, but the
26 adverse party's response, by affidavits or as otherwise provided in this rule, must
27 set forth specific facts showing that there is a genuine issue for trial." Fed. R.
28 Civ. P. 56(e). Mere disagreement or the bald assertion that a genuine issue of

1 material fact exists does not preclude the use of summary judgment. *Harper v.*
2 *Wallingford*, 877 F.2d 728 (9th Cir. 1989).

3 The Court construes all evidence and reasonable inferences drawn
4 therefrom in favor of the non-moving party. *Anderson*, 477 U.S. at 255;
5 *Brookside Assocs. v. Rifkin*, 49 F.3d 490, 492-93 (9th Cir. 1995).

6 **B. Electronic Communications Privacy Act**

7 In 1986, Congress passed the Electronic Communications Privacy Act
8 (ECPA) “to afford privacy protection to electronic communications.” *Konop v.*
9 *Hawaiian Airlines, Inc.*, 302 F.3d 868, 874 (9th Cir.2002). Congress has allowed
10 a private right of action to any “person aggrieved by any violation of this
11 chapter.” 18 U.S.C. § 2707(a).

12 There are two distinct sets of claims under the ECPA. First, under Title I
13 of the ECPA, the Wiretap Act makes it an offense to “intentionally intercept [] ...
14 any wire, oral, or electronic communication.” 18 U.S.C. § 2511(1)(a). Second,
15 under Title II of the ECPA, the Stored Communications Act (SCA), is designed
16 to “address access to stored wire and electronic communications and
17 transactional records.” 18 U.S.C. § 2701(a).

18 The Bunnell parties make their claims under the Wiretap Act. This Court
19 must therefore determine if Anderson’s actions constituted an “interception” of
20 “electronic communication” under Title I of the ECPA, the Wiretap Act.

21 **III. DISCUSSION**

22 **A. Wiretap Act Claim**

23 Neither party disputes that Anderson configured the “copy and forward”
24 function on Plaintiffs’ email server so that he would receive copies of all
25 Plaintiffs’ emails in his Google email account. The parties also do not dispute
26 that the emails are “electronic communications” as defined by the ECPA.
27 Therefore, the Court’s inquiry begins with whether said communications were
28

1 “intercepted” or acquired while in “electronic storage.”

2 For purposes of the ECPA, at any given time, an electronic communication
3 may either be intercepted and actionable under the Wiretap Act, or acquired
4 while in electronic storage and actionable under the SCA. *Konop*, 302 F.3d at
5 877. An electronic communication may not simultaneously be actionable under
6 both the Wiretap Act and the SCA. *Id.* The Ninth Circuit has rejected the
7 argument that “intercept” must apply to electronic communications in storage
8 because storage is at some point necessary for the transmission of electronic
9 communication. *Id.* It has held that Congress understood that electronic storage
10 was an inherent part of electronic communication and still chose to craft the
11 statute so that “storage” and “interception” do not coincide under the statute’s
12 definitions of the terms. *Id.* at 879, (quoting 18 U.S.C. § 2510(17)(A)). Thus, if
13 Anderson acquired Plaintiffs’ emails while they were in “electronic storage,”
14 Plaintiffs’ claim under the Wiretap Act necessarily fails.

15 The ECPA defines “electronic storage” as either “temporary, intermediate
16 storage ... incidental to ... electronic transmission,” or “storage ... for purposes of
17 backup protection.” 18 U.S.C. § 2510(17); *Theofel v. Farey-Jones*, 359 F.3d
18 1066, 1072 (9th Cir., 2004). The Ninth Circuit has noted that the ECPA’s
19 framework is at times “ill suited to address modern forms of communication”
20 because the statute was passed before mass use of email and the Internet.
21 *Konop*, 302 F.3d at 874, 876. It further recognized that the transmission time of
22 email messages is very short, as it travels through wires “at the speed of light.”
23 *Id.* at 879. Nevertheless, it has held that the duration of the storage of the
24 electronic communication is immaterial. *Id.* Even if the storage phase is
25 transitory and lasts only a few seconds, it is still considered “electronic storage”
26 under the ECPA. *Konop*, 302 F.3d at 874, 876. The Ninth Circuit observed that
27 the statute specifically states “any temporary storage” is covered under the SCA,
28 and not the Wiretap Act, and that Congress understood the transmission time of

1 emails when it passed the ECPA. *Id.*

2 In *Konop v. Hawaiian Airlines*, the plaintiff was an employee of Hawaiian
3 Airlines who operated a secure website which posted criticism of his employer.
4 A vice-president of the airline obtained access to the website by using another
5 employee's password. The plaintiff sued, alleging the airline had violated the
6 Wiretap Act when it failed to comply with the terms of use of the website and
7 entered a secure website under false pretenses. The *Konop* court held that the
8 "acquisition of email messages stored on an electronic bulletin board system, but
9 not yet retrieved by the intended recipients, was not an interception under the
10 Wiretap Act." *Id.* at 879.

11 The Ninth Circuit further elaborated on the definition of "storage" in
12 *Theofel v. Farey-Jones*, 359 F.3d 1066 (9th Cir. 2004), when it held that copies
13 of opened email messages on Internet Service Provider (ISP) servers are also in
14 "electronic storage." *Theofel*, 359 F.3d at 1076-77. *Theofel* involved the alleged
15 unlawful disclosure of emails after a subpoena was served upon the subject ISP.
16 The Court determined that prior access to the email messages by the account
17 holder was irrelevant as to whether the messages at issue were in electronic
18 storage. *Id.* at 1077. Accordingly, an email message on an ISP server is in
19 "storage" regardless of whether or not the account holder opens or reads the
20 message. *Id.* The Ninth Circuit determined that the district court correctly
21 dismissed plaintiffs' Wiretap Act claim, noting that *Konop* was dispositive. It
22 reiterated that the Wiretap Act applies only to "acquisition contemporaneous with
23 transmission," and that "Congress did not intend for 'intercept' to apply to
24 electronic communications when those communications are in 'electronic
25 storage.'" *Id.* at 1077-78, quoting *Konop* at 302 F.3d at 877.

26 The Ninth Circuit's definitions of "intercept" and "electronic storage" for
27 purposes of the ECPA are recognized in *Quon v. Arch Wireless Operating Co.,*
28 *Inc.*, 445 F.Supp.2d 1116, 1134 (C.D.Cal. 2006) (where district court was

SCANNED

1 required to determine, *inter alia*, the applicability of the SCA due to a police
2 department's investigation and audit of text messages sent by its employees).
3 There, the district court noted that even transitory storage of electronic
4 communications lasting only a few seconds fell within the provisions of the SCA,
5 as the Ninth Circuit's "narrow definition" of "intercept" for purposes of the
6 Wiretap Act meant that only an acquisition of communication "contemporaneous
7 with transmission" would fall within the scope of the Wiretap Act. Accordingly,
8 any communication acquired when in transitory storage, even if said storage
9 lasted only a few seconds, was within the purview of the SCA, and not the
10 Wiretap Act. *Id.* at 1134.

11 In the instant case, Anderson's actions necessarily fall outside the scope of
12 the Wiretap Act. Anderson configured the Bunnell parties' email server software
13 so that all Plaintiffs' messages were copied and forwarded from the server to his
14 Google email account. If the emails had not been stored on the server, Anderson
15 would not have acquired copies of them. In *Konop*, messages on a secure
16 website bulletin board that were read by an unauthorized user were deemed in
17 "electronic storage" so that they were outside the purview of the Wiretap Act.
18 Similarly, here there is also an unintended reader, Anderson, who read copies of
19 the message that had been forwarded to him. The only distinguishing
20 characteristic between the facts of *Konop* and the instant case is the place where
21 the messages are stored. In *Konop*, they were stored on a website bulletin board.
22 Here, they were stored on a server.

23 However, the place of storage will not transform Anderson's actions into
24 an interception under the Wiretap Act. In *Theofel*, copies of email messages on
25 an ISP server were determined to be in "storage." In the instant case, Plaintiffs'
26 server stored the emails before they were copied and forwarded to Anderson's
27 email account.

28 Further, the Ninth Circuit has determined in both *Konop* and *Theodel* that

1 the amount of time a message is in storage is immaterial. As such, Anderson
2 could have received the forwarded messages in milliseconds or days, it makes no
3 difference. Under the Wiretap Act, his receipt of the messages does not
4 constitute an "interception."

5 The Ninth Circuit's interpretation of the word "intercept" also comports
6 with the ordinary meaning of the word, which is "to stop, seize, or interrupt in
7 progress or course before arrival." *Konop*, 302 F.3d at 878 (quoting Webster's
8 Ninth New Collegiate Dictionary 630 (1985)). Anderson did not stop or seize
9 any of the messages that were forwarded to him. Anderson's actions did not halt
10 the transmission of the messages to their intended recipients. As such, under
11 well-settled case law, as well as a reading of the statute and the ordinary meaning
12 of the word "intercept," Anderson's acquisition of the emails did not violate the
13 Wiretap Act.

14 Defendant's motion for summary judgment as to Plaintiffs' Wiretap Act
15 claim is GRANTED and Plaintiffs' motion for summary judgment is DENIED.

16 **B. California Invasion of Privacy Claim**

17 The federal ECPA preempts the parallel state wiretap claim. First, the
18 federal Wiretap Act contains an express preemption:

19 "The remedies and sanctions described in this chapter with respect to the
20 interception of electronic communications are the only judicial remedies
21 and sanctions for nonconstitutional violations of this chapter involving
22 such communications."

23 18 U.S.C.A. § 2518(10)(c).

24 Second, Plaintiffs' state wiretap act claim is preempted by "field
25 preemption." As the Ninth Circuit states when describing the preemption
26 doctrine:

27 "Even in the absence of express preemptive text, Congress' intent to
28 preempt an entire field of state law may be inferred "where the scheme of

1 federal regulation is sufficiently comprehensive to make reasonable the
2 inference that Congress 'left no room' for supplementary state regulation"
3 (field preemption)."

4 *In re Cybernetic Servs., Inc.*, 252 F.3d 1039, 1045-46 (9th Cir.2001). The
5 scheme of the ECPA is very comprehensive: it regulates private parties' conduct,
6 law enforcement conduct, outlines a scheme covering both types of conduct and
7 also includes a private right of action for violation of the statute. As such, it is
8 apparent to this Court "that Congress 'left no room' for supplementary state
9 regulation." *Id.* at 1045.

10 Additionally, the ECPA's preemption over state law claims has been
11 recognized by the district court in *Quon v. Arch Wireless Operating Co., Inc.*
12 The *Quon* court noted that "the remedies outlined in the SCA [Title II of the
13 ECPA] are the exclusive ones a party may pursue in court for conduct covered by
14 the statute: 'The remedies and sanctions described in this chapter are the only
15 judicial remedies and sanctions for nonconstitutional violations of this chapter.'"
16 *Quon v. Arch Wireless Operating Co., Inc.*, 445 F.Supp.2d 1116, 1138
17 (C.D.Cal.,2006).

18 Accordingly, Plaintiffs' state wiretap act claims are preempted by the
19 ECPA and Defendant's motion for summary judgment as to Plaintiffs' claim
20 under California Invasion of Privacy Act, Cal. Penal Code §§ 631 *et seq.*, is
21 GRANTED.

22 **C. Trade Secrets Claim**

23 The California Uniform Trade Secrets Act (UTSA) provides for damages
24 and injunctive relief for the "misappropriation" of "trade secrets." See Cal. Civil
25 Code §§ 3426.2 -.3. Pursuant to the UTSA, "trade secret" means information,
26 including a formula, pattern, compilation, program, device, method, technique, or
27 process, that:

- 28 (1) Derives independent economic value, actual or potential, from not

SCANNED

1 being generally known to the public or to other persons who can
2 obtain economic value from its disclosure or use; and

3 (2) Is the subject of efforts that are reasonable under the circumstances
4 to maintain its secrecy.

5 Cal. Civil Code § 3426.1(d).

6 The trade secret's subject matter must be described with "sufficient
7 particularity to separate it from matters of general knowledge in the trade or of
8 special knowledge of those persons ... skilled in the trade." *Imax Corp. v. Cinema*
9 *Technologies, Inc.* 152 F.3d 1161, 1164 -1165 (9th Cir.,1998) (quoting
10 *Universal Analytics v. MacNeal-Schwendler Corp.*, 707 F.Supp. 1170, 1177
11 (C.D.Cal.1989), *aff'd*, 914 F.2d 1256 (9th Cir.1990)). The trade secret also has to
12 be described with sufficient particularity "to permit the defendant to ascertain at
13 least the boundaries within which the secret lies." *Diodes, Inc. v. Franzen*, 260
14 Cal.App.2d 244 (1968), *accord Imax Corp*, 152 F.3d at 1163-64.

15 The Ninth Circuit affirmed the district court's granting of summary
16 judgment against the plaintiff on a claim of trade secret misappropriation under
17 California law because the plaintiff failed to adequately identify its claimed trade
18 secrets in response to the defendant's interrogatories. *Id.* A broad interrogatory
19 answer that unspecified "dimensions and tolerances" of the plaintiff's movie
20 projector system were the trade secrets failed to provide the required level of
21 specificity. "A plaintiff must do more than just identify a kind of technology and
22 then invite the court to hunt through the details in search of items meeting the
23 statutory definition [of a trade secret]." *Id.*

24 Similarly, in the instant case, Plaintiffs have failed to identify exactly what
25 the trade secret is and apparently expect the Court to determine how the
26 documents delivered to the MPAA by Anderson constitute a trade secret.
27 Anderson's one time deliverance of 34 documents to the MPAA does not in and
28 of itself constitute a trade secret violation. Plaintiffs claim that said

SCANNED

1 documentation "as a whole" derives value. The *Imax* plaintiffs also tried to refer
2 to a range of documents when asked to identify their trade secrets, to no avail.
3 Plaintiffs in this case have not identified with any measure of particularity what
4 trade secrets the documents given to MPAA contain. As such, they have failed to
5 meet their burden. Accordingly, Defendant's motion for summary judgment as to
6 plaintiffs' trade secrets claim is GRANTED.

7 **D. §17200 Claim**

8 Plaintiffs' claim under California's Unfair Competition Law, Cal. Bus. &
9 Prof. Code §§17200, *et seq*, focuses solely on the provision supporting claims
10 based on another "violation of law." As Plaintiffs have not shown any violation
11 of law under either the Wiretap Act or the Trade Secrets Act, their §§17200 claim
12 fails as well. Accordingly Defendant's motion for summary judgment as to this
13 claim is GRANTED.

14 **V. CONCLUSION**

15 Therefore, Plaintiff's Motion for Summary Judgment (docket no. 169) is
16 DENIED. Defendant's Motion for Summary Judgment (docket no. 136) is
17 GRANTED.

18 Defendants are ordered to submit a proposed judgment, consistent with
19 this Order, to the Court within 20 days of the date of this Order.

20
21
22 August 21, 2006

FLORENCE-MARIE COOPER, Judge
UNITED STATES DISTRICT COURT
